Statistics & Probability – SAMPLE QUIZ

Introductory Vocabulary:

- 1) When referring to a sample we reference a statistic, but when referring to a population we reference a parameter.
- 2) Categorical data places an individual into one of several groups or categories.
- 3) The entire collection of individuals or objects about which information is desired is called the population of interest.
- 4) The two major branches of statistics are descriptive and inferential.
- 5) Collection of data from every member of the population is called a census.
- 6) A sample is a subset of the population, selected for study in some prescribed manner.
- 7) A univariate data set consists of observations on a single variable made on individuals in a sample or population.
- 8) Statistics is the study of data.
